

## A Quick Introduction to Steak

### Grass Fed Versus Grain Fed

Grass fed beef has a lower fat content & a clean, mild flavour. Grass fed meat is also more environmentally sound. Grain fed beef has a consistent strong, rich, buttery flavour. It has a high marbling content making the cut more tender & softer in texture.

### Wet Aged Versus Dry Aged

Beef is normally wet aged which improves tenderness but does rob the beef of some flavour.

For dry aging, beef is hung in a controlled environment; a specialised dry ageing cabinet that maintains temperature & humidity for anywhere between 4 weeks & 12 months. A protective layer forms around the cut allowing the juices & liquids to reabsorb into the muscle. This intensifies the flavour & allows the beef to become more relaxed & tender. The result is a truly unique eating experience.

### What is Marbling

The intramuscular fat running through the inside of the muscle is known as marbling. The amount of marbling is influenced by the breed, feed & age of the animal. Basically, marbling is fat & fat equals flavour & tenderness. Marbling is assessed & scored in Australia on a scale of 0-9. The higher the number the better!

Wagyu is a Japanese breed of cattle with a genetic potential for producing beef with a high marbling content & a fine texture. Wagyu breeds are finished on grain to help develop the marbling content.
